# ***about***

A singer, songwriter, lyricist and producer, the multi-talented Swsh has crafted a distinct and signature sound that's all their own. As a non-binary artist, Swsh empowers and holds true to what it means to be yourself and a beacon of hope for those who feel as if they don't have the platform to do the same. Developing their musical palate from the age of five, Swsh would begin learning to play piano in their childhood home in Southern California. Quickly adding guitar and bass to their repertoire, their skills would ultimately culminate in the production of their own music. With their powerhouse vocals and soulful style, Swsh instills a sense of independence and liveliness within each release - waxing poetic on everything from love and relationships, body and sex positivity, and more.
