

SUB-RADIO

about

Sub-Radio is an indie pop band based in Washington DC. Formed by a group of childhood friends, the band has built a global following on the strength of electric live shows, viral social media videos, and a stream of releases.

Following the release of their 2020 EP *Thoughts Lights Colors Sounds*, produced by Andrew Maury (Shawn Mendes, Lizzo, COIN), the band embarked on a pandemic-induced “virtual tour,” live-streaming their energetic performances to 20+ million viewers and building a worldwide community of fans. The band signed with indie label Th3rd Brain in early 2022, playing sold-out rooms in the UK and US and releasing the new EP *Past Selves* in 2023, featuring the single “1990something” produced by Jason Evigan (Maroon 5, Nick Jonas, Dua Lipa, Justin Beiber).
